- **2013**: 31 Fatalities, 17 Unbelted Fatalities
- **2014**: Not Yet Available

**As SAFE has grown, the trend of unbelted fatalities in Kansas has continued to decrease.**

State Fatalities Age 14-19
Over the last six years, as schools have started and continued in the SAFE program, baseline survey results have increased at a more drastic rate, closing the gap between the initial and final usage rates. This, as indicated in previous data, demonstrates that schools involved in SAFE generate students who wear their seatbelts. In other words, SAFE works.
